

Prodec Networks Limited

Archiving and eDiscovery Solution

For Hosted Exchange 2007

Prodec provides Microsoft Exchange customers of all sizes with an affordable, scalable, secure and feature rich hosted email archiving and eDiscovery service. Prodec Archive is designed to help these customers satisfy any of following requirements:

- Regulatory Compliance (SEC, FINRA, SOX, FRCP, etc)
- Litigation Support and eDiscovery
- Storage Resource Management
- Business Continuity and Best Business Practice

The Prodec Archive Service is an on-demand hosted service that requires the installation of no hardware or software at your location. Within a matter of minutes, you will be archiving your email automatically from your Microsoft Exchange to our safe and secure data centers.

- **Unlimited Storage** - Other vendors charge extra for hosted archive storage, which makes estimating true service costs near impossible. With Prodec, there are never any hidden fees and Prodec Archive includes unlimited storage.
- **All Data Searchable at All Times** - Other hosted archive vendors, in order to keep their costs low, migrate your older data to offline or near-line storage systems. This dramatically increases the amount of time required to search. Prodec keeps all data online and immediately accessible for searches.
- **No Training Required** – Prodec user interfaces are intuitive for all skill-set levels. Administrators use self-service web UI's to configure the system without the need for systems engineers.
